ZUBIA
TECNOLOGIA
TUBULAR

Presentation

Our organization celebrated its 50th anniversary in July 2014. Our activity started with the manufacture of cradles but we have not been sleeping until now.

We can also offer bending, end forming, welding and mounting of sets.

We can offer pipe forming operations in different type of material:

- Steel
- Stainless steel
- Galvanized steel
- Copper
- Aluminum
- Brass

Our team

In order to fulfill our customers requirements, each production plant is formed by a skilled team.

Our technical office will be in contact with the customers during designing phase so we can advice and reduce manufacturing costs.

Our company size, with 40 people, gives us flexibility for fitting to the market requirements.

Our philosophy

We consider our customers above all as a partner with whom we will collaborate and grow.

Each order, is a challenge that allows us to increase our knowledge level.

We like to follow our customers innovations in order to offer them the optimum solution in the manufacture of the tubular parts.

Quality

Our activity is based on the customer's satisfaction concerning Quality and Service.

Two production plants to fulfill every customer requirements

Zubillaga production plant

Specialized in manufacturing tubular parts for medium and large batches.

Olabarrieta production plant

Specialized in manufacturing tubular parts for small and large dimensions.

Equipments

☐ Bending

We have 7 CNC bending machines, the newest an sophisticated one since March 2015

☐ Forming

We have 5 CNC forming machines, the newest an sophisticated one since March 2015

☐ Welding

We can realize different type of welding: Oxy acetylene, TIG, MIG, Brazing...

☐ Leakage testing

We have leakage testing machines (150mbar, 2bar, 6bar and 20 bar).

☐ Set mounting working area

Activity sectors

Hydraulic

Features

- Hydraulic tubes (\emptyset maximum 25mm)
- E02 crimping
- JIC 37
- Welding (brazing, TIG, MIG...)
- Leakage testing

Boiler

Features

- Copper tubes
- End forming
- Welding
- Leakage testing

Activity sectors

Gas

Features

- Galvanized steel tube
- End forming
- Welding
- Leakage testing

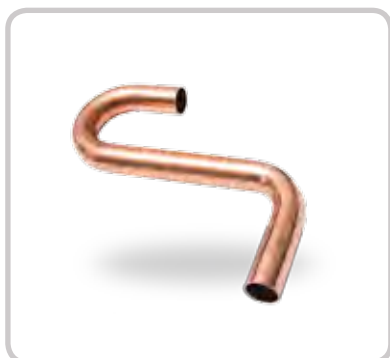

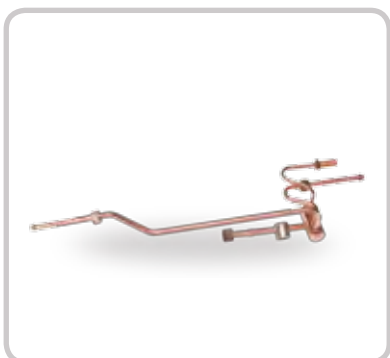

Air conditioning

Features

- Copper tubes
- End forming
- Welding
- Deliveries per Kit
- Leakage testing

Miscellaneous

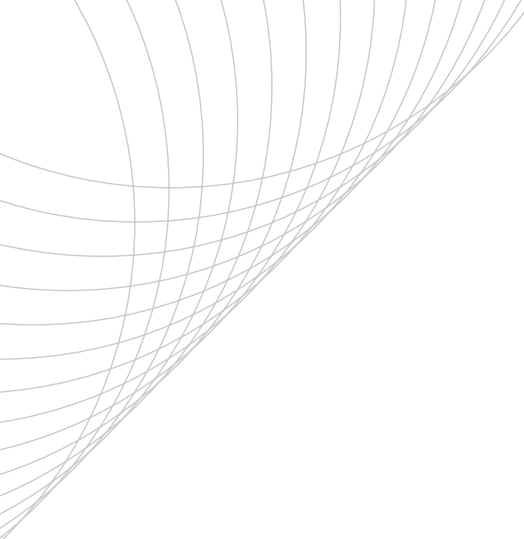

Features

- Stainless steel tubes
- Galvanized steel tubes
- Copper
- Aluminum end forming till 60 mm
- Welding
- Leakage testing
